Planning Logic – Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task. It is part of an Epic.

A Story Point is a number that represents how much effort a story takes to complete (usually in the form of the Fibonacci series).

1 - Very Easy task
2 - Normal task
3 - Moderate task
5 - Difficult task

Story Point scale - 1, 2, 3, 5

Sprint 1

Requirement & Request Design (Epic 1)

Identifying Laptop Request Requirements (USN1) 2

Defining Standard Laptop Catalog Criteria (USN2) 2

Designing Request Data Fields (USN3) 3

Approval & Procurement Rules (Epic 2)

Defining Approval Conditions (USN4) 3

Defining Standard Order Validation Rules (USN5) 3

Sprint 1 Total Story Points = 2+2+3+3+3 = 13

Sprint 2

Flow Designer Automation (Epic 3)

Creating Laptop Order Flow (USN6) 5

Automating Approval Routing (USN7) 3

Automating Procurement/Order Action (USN8) 5

Notifications & Tracking (Epic 4)

Configuring Request Status Updates (USN9) 2

Configuring Requester Notifications (USN10) 2

Testing & Exception Handling (Epic 5)

Testing Standard and Exception Scenarios (USN11) 5

Sprint 2 Total Story Points = 5+3+5+2+2+5 = 22

Total Story Points

Sprint 1 = 13

Sprint 2 = 22

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = 13+22 = 35

Number of Sprints = 2

Velocity = 35/2

17.5 Story Points per Sprint

The team's planned velocity is 17.5 Story Points per Sprint.
