Project Development Phase

Machine Learning / Model Performance Test

Date	01 October 2026
Team ID	SWTID-2026-2670
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	10 Marks
Technology	ServiceNow Flow Designer

Model Performance Testing

Project team shall fill the following information in the model performance testing template.

S.No.	Parameter	Values	Screenshot
1	Metrics – Classification / Decision Model	If an ML classification model is implemented for laptop-order classification: Confusion Matrix – _____ Accuracy Score – _____ Precision – _____ Recall – _____ F1 Score – _____ Classification Report – _____	Attach model evaluation screenshot
2	Metrics – Regression Model (if used)	If a regression model is implemented for procurement prediction: MAE – _____ MSE – _____ RMSE – _____ R^2 Score – _____	Attach regression evaluation screenshot
3	Model Purpose	Classify or predict whether a laptop request meets the standard procurement criteria before the automated Flow Designer process	Attach model/flow integration screenshot

		continues.	
4	Hyperparameter Tuning	Model parameters tested: _____ Best parameters: _____ Tuning method: _____	Attach tuning results screenshot
5	Validation Method	Validation method: Train/Test Split or Cross-Validation Training/Test Split: _____ / _____ Number of validation folds (if applicable): _____	Attach validation result screenshot
6	Final Model Result	Selected model: _____ Final metric/result: _____ Model accepted for integration: Yes / No	Attach final model result screenshot

Important Project Note: The provided source template contains standard Machine Learning metrics for regression and classification. Your stated project is primarily a ServiceNow Flow Designer automation project. Therefore, these ML metrics should only be completed if your project actually includes a trained ML model. If no ML model is used, mark the ML metric fields as Not Applicable (N/A) and evaluate the Flow Designer using functional and performance testing.
